PROFESSIONAL SUMMARY

Product-driven Software Engineer with experience building scalable backend architectures, distributed microservices, and high-availability systems. Skilled in full-stack development, cloud infrastructure, and performance optimization.

EXPERIENCE

Software Engineer Intern

Jun 2024 – Dec 2024

Tech Verse Solutions

- Architected distributed microservices for 50,000+ monthly users
- Engineered RESTful APIs with Python and Node.js, reducing latency by 25%
- Built batch-processing data pipelines on AWS (EC2, S3, DynamoDB), cutting costs by 18%

Fullstack Developer

Jun 2022 – Jul 2023

Coinmint

- Engineered backend APIs and optimized server-side data retrieval
- Integrated third-party services with secure end-to-end data flows
- Accelerated development by 20% using React and scalable backend integration

Fullstack Developer

Dec 2021 – Sep 2022

SpotLine

- Led development of 5+ large-scale web applications, increasing engagement by 20%
- Redesigned 10+ websites improving performance by 25% and mobile responsiveness by 30%
- Optimized Core Web Vitals, reducing page load time by 30%

EDUCATION

University of Windsor (2024)

2020 – 2024

Bachelor of Computer Science in Computer Science

Bachelor of Computer Science graduate

SKILLS

Languages

.NET (CLR/BCL), C#, Python, TypeScript, JavaScript, HTML5, CSS3, PostgreSQL, SQL

Frameworks & Libraries

Node.js, React.js, Angular

Tools & Platforms

AWS (EC2, S3, DynamoDB, Lambda), Docker, Kubernetes, CI/CD

Databases

MongoDB

Other

REST APIs, Microservices

Soft Skills
